

Russ,

I wanted to let you know that your products are fitting into our agronomic program in huge ways. We are seeing results in enormous proportions, with the carbon product that we incorporated into our soil profiles. We are seeing less nematode activity, reduced fertility rates, and longer nutrient retention in the soils. We also applied the carbon product to reduce nutrient runoff into the ecosystem during the grow-in of the Old Course at Broken Sound summer of 2015 with incredible results as well. Your product is now part of our annual agronomic programs here at Broken Sound Country Club in Boca Raton, Florida.

Thank you,
