### Upstart Newsletter November 2016

We hope everyone stayed safe through Hurricane Matthew and have now recovered, repaired and restored any damage.

As the Florida tourist season approaches, and with Thanksgiving and the Holidays around the corner, we know that the golf courses will be extremely busy. Let us help you keep those greens pristine with our effective Insect Control Program.

#### Insect Control Program

Our Insect Control Program gives you effective grub, bug and mole cricket control with the addition of a surfactant for better utilization of the product.

We offer a choice of effective options, exciting discounts and extended terms, plus added protection with Acephate 97 and optional professional application by Southern Soils Turf Management.

*We have a number of other turf programs and promos running at the moment to help keep your greens pristine - they also help with the budget! Just click the link below for more information.*

#### BORDER™ T&O

##### SPRAY PERFORMANCE ADJUVANT

Improve your spray performance and return on product investment with Border T&O from Precision Laboratories.

Plant protectants, growth regulators and foliar nutrients will not produce effective, long-term results if they do not hit their target.

Border T&O is designed to increase product efficacy by improving droplet adhesion and coverage on the leaf surface while dramatically reducing off target movement.

#### Equipment and Accessories

Keep your course looking ultra smart with the finest quality accessories, flags and equipment.

We have an extensive selection of golf course signage, flags, safety products, tee markers, ball washers, hole cutters and cups - and a whole lot more!
