

MIRIMICHI GREEN™

Activate Nature.

PRO CONCENTRATE WEED & GRASS CONTROL

A REVOLUTIONARY PRODUCT

Mirimichi Green Pro Concentrate is a non-selective herbicide with residential, commercial, and non-crop uses. It controls weeds in homeowner lawns, gardens, driveways, patios, and flower beds. It is registered for public uses such as municipalities, right-of-ways, sports fields, golf courses, and natural habitats. Applications also include weed control in farmsteads, turf farms, production greenhouse, establishing native grasses and ornamentals, and trees grown for production.

The formulation is an easy-mix concentrate. No surfactant is needed. No translocation is necessary as the herbicide kills on contact. Since Mirimichi Green Pro Concentrate is rapidly broken down in soils, there is no chance for environmental buildup or runoff into ponds and streams. EPA and OMRI approved for organic production—it is a great natural alternative to traditional herbicides.
